

SIMPLIFYING COMPLEXITY

Transforming ideas into next-gen IT solutions

Who we are

We don't like to call ourselves an IT-company.

We are more like a **digital atelier**,
because we put all our creativity into computer code.

Our Key Competencies

Large **Web3** Development Experience

We have developed a variety of solutions in the Web3 space for different needs, ranging from API development for executing limit orders on DEX markets for DexTools to our own multi-blockchain wallet or crypto-payment system.

Blockchains We Use

Solana

Ethereum

Tron

Binance

HANDLED TRANSACTIONS

Our **Web3** Projects

DexTools

We created an API for operating with limit orders on DEX markets for DexTools. The API was designed to retrieve up to 100,000 transactions per day and scale as needed.

Explore 

Duel Duck

Development of a smart contract in the Prediction market niche, including the implementation of a multichain wallet for users.

Explore 

Payment Service

Creation of a multichain crypto payment system that can be integrated with any project.

Explore 

Cross-Platform Solution Development

We develop applications for all possible platforms, from web services and mobile apps to in-app solutions such as mini-apps in Telegram or smart widgets on Twitch.
